NATIONAL FLIGHT TEST CENTRE
AERONAUTICAL DEVELOPMENT AGENCY

The National Flight Test Centre (NFTC) was formed under Aeronautical Development Agency (ADA) on 21 Jul 1994 for undertaking flight testing of prototype Light Combat Aircraft (LCA). With a motto of "Test to Perfect", they have undertaken various prototype and certification trials for LCA, both Air Force (AF) and Navy (N) variants. Over the years, NFTC has grown into an institution of expertise for developmental testing of land-based and carrier-based fighter aircraft and is progressing towards its vision of becoming a hallmark centre for flight testing of next generation fighter aircraft for India.
